VirusPlatform · Plant Virus Analysis Platform

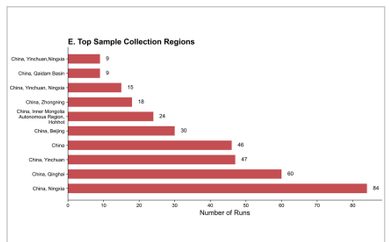

- **Data acquisition**
  - Public data search (SRA + GSA)
  - Reference & host genome download
  - Sample virome prescreening
  - Database construction
- **Virus Detection & Identification**
  - Host read removal
  - Known virus ID & quantification
  - Metaviral assembly
  - Host prediction
- **Annotation & genomics**
  - ORF prediction & annotation
  - Genome maps
  - Tree inference
  - SDT identity analysis
- **Evolution & Phylodynamics**
  - Molecular clock dating
  - Phylogeography
  - Recombination (RDP5)
  - Skyline & BSP
- **Assay design**
  - Primer design
  - CRISPR assay design
  - dsRNA design
  - miRNA target prediction
- **Tracing & submission**
  - LOGAN tracing
  - NCBI submission
  - AI assistant
